Between March and April 2016, Food and Non-Alcoholic Drinks' Index

increased by 1.48 per cent. As indicated in Table 3, this resulted from notable increases in prices of some food items. However, in totality food inflation stood at 6.84 per cent, which is the lowest, recorded in the recent past.

Over the same review period, Housing, Water, Electricity, Gas and Other Fuels' Index, increased by 0.15 per cent. This small aggregate increase was mainly as a result of price increases in respect of kerosene and other cooking fuels. The cost of electricity however, remained at the same level as in the previous three months of January to March 2016.

The Transport Index decreased by 0.42 per cent in April 2016 compared to the previous month mainly due to reduced costs of petrol.
