Between November and December 2014, Food and Non-Alcoholic Drinks' Index increased by 0.71 per cent. As indicated in Table 3 above, the increase in food inflation resulted from observed rises in the prices of several food commodities which outweighed notable falls in the prices of others.

Over the same period, Housing, Water, Electricity, Gas and Other Fuels' Index, decreased by 0.06 per cent. This decline was mainly attributed to notable falls in the cost of cooking fuels especially electricity. Contributing to lower cost of electricity was fuel cost adjustment which decreased from KSh 3.47 per KWh in November to KSh 2.87 per KWh in December 2014.

During the same review period, the Transport Index increased by 0.91 per cent. Despite notable reductions in the pump prices of petrol and diesel, an upsurge in the transportation inflation was recorded mainly due to higher taxi, matatu and bus fare charges associated with christmas festivities.
