**Statistical Release**

# **Quarterly Gross Domestic Product Report**

## **Third Quarter, 2020**

---

**27<sup>th</sup> January, 2020**

## 1.0 Economic performance

Economic performance in the third quarter of 2020 remained depressed but relatively better compared to the second quarter of 2020. Real GDP is estimated to have contracted by 1.1 per cent in the quarter compared to a growth of 5.8 per cent in the corresponding quarter of 2019. During the quarter in review, the performance albeit constrained, was supported by a significant improvement in agricultural production and accelerated growths in mining and quarrying, construction, and public administration. Strong growths in information and communication, financial and insurance, and real estate also supported growth from a deeper contraction. The contraction was much lower than that recorded during the previous quarter largely against a backdrop of partial easing of COVID-19 containment measures that facilitated gradual resumption of a number of economic activities.

The robust growth in agricultural activities was driven by favorable weather conditions witnessed in the first three quarters of the year, while the substantial growth in the construction sector was manifest in notable increase in consumption of cement. However, the performance was curtailed by moderate contraction in manufacturing and distributive trade activities coupled with significant underperformance in accommodation and food service activities, and education activities during the quarter in review.

**Figure 1: Third Quarter GDP Growth Rates (%), 2015-2020**

During the quarter under review, macroeconomic environment was premised on the need to cushion the economy from the adverse effects of COVID-19

pandemic. Inflation eased from 5.03 per cent recorded in the third quarter of 2019 to 4.31 per cent in the quarter under review. Central Bank Rate (CBR) was maintained at 7.00 per cent during the entire quarter compared to 9.00 per cent recorded in the third quarter of 2019. Broad money supply rose from KSh 3,473.4 billion in September 2019 to KSh 3,843.5 billion in September 2020. The initiative by Central Bank to lower CBR and increase money supply was aimed at stimulating the economy amidst the negative impacts of the COVID-19 pandemic.

The slowdown in economic activities was evidenced by 27.6 per cent drop in NSE Share index in the quarter under review to stand at 1,852 points as at September 2020. In the money market, the Kenyan Shilling depreciated against all major international trading currencies in the third quarter of 2020 compared to the corresponding quarter of 2019. On average, the Kenyan Shilling depreciated by 9.8, 9.3, 5.6 and 2.8 per cent, respectively, against Euro, Pound Sterling, Japanese Yen and US Dollar. The Shilling however appreciated against regional currencies notably the South Africa Rand by 8.69 per cent in the quarter under review. Current account deficit improved by 10.6 per cent from KSh 157.9 billion in the third quarter of 2019 to KSh 141.1 billion in the review period.

## **2.0 Sectoral Analysis**

### **Agriculture, Forestry and Fishing**

The sector recorded a growth of 6.3 per cent in the third quarter of 2020 compared to 5.0 per cent growth in the third quarter of 2019. The impressive performance was supported by increases in tea production, exports of fruit and sugarcane production. Tea production expanded by 13.7 per cent in the quarter under review to stand at 118.5 thousand metric tonnes. This was also reflected in the increase in volume of tea export by 24.6 per cent from 111.3 thousand metric tonnes in the third quarter of 2019 to 138.6 thousand metric tonnes in the quarter under review. Cane deliveries increased significantly by 91.9 per cent to stand at 1,900.0 thousand metric tonnes in the third quarter of 2020. Fruit exports increased from 19.0 thousand metric tonnes in the third quarter of 2019 to 25.0 thousand metric tonnes in the review period. However, the performance of the sector was hampered by decline in number of activities such as coffee exports, milk intake, vegetable exports, and cut flower exports which declined by 17.0 per cent, 8.3 per cent, 6.9 per cent, and 6.7 per cent, respectively.

### **Manufacturing**

Manufacturing sector is estimated to have contracted by 3.2 per cent in the quarter under review compared to 3.9 per cent growth in the corresponding

quarter of 2019. The contraction was shown in the various food sub-sectors such as; manufacture of meat and meat products, manufacture of liquid milk, manufacture of wheat flour, manufacture of beverages and manufacture of grain mill products. Conversely, manufacture of edible fats and oils, and manufacture of cigarettes expanded in the review period. Manufacture of nonfood products showed mixed performance with manufacture of cement, manufacture of galvanized iron sheets, assembly of motor vehicles and manufacture of thinners posting positive growths. On the other hand, contractions were recorded in the manufacture of cotton woven fabric.

### **Construction**

Construction sector recorded 16.2 per cent growth in third quarter of 2020 compared to 6.6 per cent growth in the corresponding quarter of 2019. The growth was evidenced in the volume of cement consumed which increased by 23.5 per cent from 1,553.8 thousand metric tonnes in the third quarter of 2019 to 1,925.2 thousand metric tonnes in the review period. On the same note, import values of construction related materials such as timber, wood products, bitumen, lime, cement, plumbing materials and glass products increased in the quarter under review. Credit advanced to this sector grew by 4.9 per cent in the review period.

### **Electricity and Water Supply**

The sector expanded by 4.7 per cent in the period under review compared to 6.4 per cent growth in the third quarter of 2019. Total volume of electricity produced increased marginally by 0.8 per cent in the third quarter of 2020 compared to 2.1 per cent growth the third quarter of 2019. Notably, electricity generation from thermal and geothermal declined by 40.4 per cent and 6.2 per cent to stand at 220.6 million-kilowatt and 1,237.8 million-kilowatt, respectively, in the review period. Similarly, electricity generated from wind declined from 429.2 million-kilowatt in the third quarter of 2019 to 368.9 million-kilowatt in the review period. Nevertheless, the sector's performance was somewhat cushioned from severe slow down by hydro-electric power generation which increased by 42.0 per cent to stand at 1,071.3 million-kilowatt in the third quarter of 2020. The increase in hydro-electric power generation was supported by sufficient rains received.

### **Transportation and Storage**

Transportation and storage sector grew by 2.9 per cent in the review period compared to 7.6 per cent growth in the third quarter of 2019. The sector's performance was curtailed by contractions in activities of air transport and Standard Gauge Railway (SGR) passenger transport which had not picked despite easing of COVID-19 containment measures. The SGR passenger

transport contracted by 77.5 per cent while number of visitors' arrivals through the two major international airports contracted by 92.4 per cent. However, the sector was buoyed by an increase in Port throughput from 8,325 thousand metric tonnes in the third quarter of 2019 to 8,655 thousand metric tonnes in the review period. Similarly, freight movement through SGR expanded by 8.8 per cent to stand at 1,205.8 thousand metric tonnes in the third quarter of 2020. Consumption of light diesel expanded by 2.2 per cent in the quarter under review compared to 1.0 per cent contraction in the corresponding quarter of 2019.

### **Accommodation and Food Services**

The sector contracted by 57.9 per cent compared to 9.9 per cent growth in the third quarter of 2019. Activities related to accommodation and food service were adversely affected by COVID-19 pandemic which saw implementation of containment measures. This led to either complete closure of businesses in accommodation and food service sector or significantly scaled down operations. Despite easing of the containment measures in the review period, the sector was struggling to overcome the effects of the restrictive measures earlier implemented. The number of visitor arrivals through the two major international airports declined from 453,881 passengers in the third quarter of 2019 to 34,701 passengers in the review period.

### **Financial and Insurance Activities**

Financial and insurance sector grew by 5.3 per cent in the third quarter of 2020 compared to 8.1 per cent growth in the corresponding quarter of 2019. During the review period, the Central Bank of Kenya (CBK) maintained an accommodative monetary policy stance adopted in the second quarter of 2020 to support the financial system from effects of the COVID-19 pandemic. Broad money supply (M3) expanded to KSh 3,843.5 billion as at September 2020 from KSh 3,473.4 billion as at September 2019. Central Bank Rate (CBR) stood at 7.00 per cent in September 2020 compared to 9.00 per cent in September 2019. This was after a downward revision from 7.25 per cent in March 2020 to 7.00 per cent in April 2020. The 91 days Treasury bill rates were revised to 6.29 per cent in September 2020 from 6.35 per cent in September 2019. Net foreign assets reduced from KSh 837.4 billion as at September 2019 to KSh 751.3 billion as at September 2020.

Interest rates for commercial banks loans and advances declined from 12.47 per cent in September 2019 to 11.75 per cent in September 2020. The average deposit rate reduced from 6.98 per cent in September 2019 to 6.41 per cent in September 2020. The savings rate reduced to 3.78 per cent in September 2020 from 4.58 per cent in September 2019. Interbank rates decreased from 6.59 per

cent in September 2019 to 2.95 per cent during the review period. Figure 2 presents trends in interest rates for the period January 2019 to September 2020.

**Figure 2: Trends in interest rates, January 2019 to September 2020**

Figure 3 shows the value of shares traded and the NSE 20 share index from January 2019 to September 2020. The Nairobi Securities Exchange (NSE) 20 Share Index decreased from 2,432 points in September 2019 to 1,852 points in September 2020. The total value of shares traded increased to KSh 13.9 billion in September 2020 from KSh 10.6 billion in September 2019.
