
Statistical Release

Quarterly Gross Domestic Product Report

First Quarter, 2018

29th June, 2018

1.0 Economic performance

Provisional estimates of Gross Domestic Product (GDP) indicate that the economy expanded by 5.7 per cent during the first quarter of 2018 compared to 4.8 per cent in a similar quarter of 2017. The significant acceleration in growth was mainly attributable to improved weather conditions and a boost in business and consumer confidence after the conclusion of general elections in 2017. From the supply side, growth was mainly driven by a recovery in activities of Agriculture as well as improved output in Wholesale and Retail Trade, Manufacturing, and Real Estate sectors. On the other hand, Financial and Insurance; Transportation and Storage; Construction; Electricity Supply; and Mining and Quarrying recorded marked slowdown in the growth. Growth of activities in the Information and Communication was robust while Accommodation and Restaurants slowed significantly but remained relatively strong. Performances of the first quarter GDP since 2013 are presented in Figure 1.

Figure 1: First Quarter GDP Growth Rates

Key macroeconomic indicators were largely favourable to growth during the review period. Inflation averaged at 4.49 per cent during the review quarter compared to an average of 8.77 per cent experienced during the same period of 2017. The slowdown in inflation was mainly influenced by lower food prices during the period under review. In the money market, the Kenya Shilling recorded mixed performance against its major trading currencies. The most noticeable was a significant weakening of the Shilling against the Euro and the Pound Sterling.

Weighted interest rates for commercial banks loans and advances averaged at 13.67 per cent during the first two months of 2018 compared to 13.68 per cent during similar period in 2017 against a background of an unchanged Central Bank Rate of 10.00 since August 2016. However, the rate dropped to 13.49 per cent after the CBR was reviewed downwards to 9.50 per cent in March 2018. Nairobi Securities Exchange recorded improved activities with the NSE 20 Share Index averaging at 3,780 points compared to an average of 2,956 points during the same quarter in 2017. The value of total exports rose to KSh 161.7 billion in the quarter under review from KSh 150.9 billion in the first quarter of 2017 mainly due a significant increase in exports of tea, cut flowers and fruits. The value of total imports rose by 3.7 per cent to KSh 438.5 billion over the

same period. The current account balance narrowed to KSh 107.9 billion during the period under review from a deficit of KSh 129.7 billion in the same quarter of 2017.

2.0 Sectoral Analysis

Agriculture, Forestry and Fishing

During the quarter under review, the sector grew by 5.2 per cent compared to 1.0 per cent in a similar period of 2017. The sector's growth was mainly supported by favourable weather conditions during the fourth quarter of 2017 and onset of long rains in early March 2018. Largely, improved growths were recorded in most sub-sectors except Fishing, where the performance remained subdued during the quarter under review.

The volume of tea produced rose by 10.7 per cent in the first quarter of 2018 mainly attributable to ideal weather conditions that prevailed during the quarter under review. Similarly, the volume of cane deliveries rallied from a slump (29.8%) in the first quarter of 2017 to increase by 17.3 per cent in the review quarter. However, the sector's performance was partly curtailed by a notable decline in the volume of coffee produced during the period under review.

The volume of horticultural crop produce rose significantly during the quarter under review except that of vegetables that declined by 2.9 per cent. Specifically, the volume of cut flowers and fruits exported increased by 12.4 and 15.3 per cent, respectively during the review period. As a result, the value of the horticultural crop exports rose by 39.1 per cent to stand at KSh 44.0 billion in the quarter under review.

In the dairy sub-sector, the volume of milk delivered to processors rose significantly (22.8%) compared to a depressed performance reported in the corresponding quarter of 2017. The improved performance was mainly driven by sufficient rains during the quarter under review that consequently ensured availability of pastures.

Manufacturing

The manufacturing sector grew by 2.3 per cent in the quarter under review compared to a growth of 1.3 per cent in a similar quarter in 2017. The improved growth was mainly supported by increased production in the manufacture of food sub-sector. Growth in the food products sub-sector was supported by processing of canned fruits, processing of wheat flour and maize meal, manufacture of bakery products, manufacture of sugar and manufacture of soft drinks. In the non-food sub-sector, growth was buoyed by manufacture of leather products and manufacture of galvanized sheet. However, growth in the sector was constrained by manufacture of cement and assembly of motor vehicles. Credit advanced to the sector grew by 11.3 per cent in the first quarter of 2018 compared to a decline of 7.8 per cent in the corresponding quarter of 2017.

Construction

The Construction sector grew by 7.2 per cent in the quarter under review compared to 8.2 per cent growth realized in the first quarter of 2017. The deceleration was reflected in the decline in consumption of cement from 1.5 million tonnes in the first

quarter of 2017 to 1.4 million tonnes in the quarter under review. The decline in cement consumption was also manifest in notable decreases in the volume of import of cement (15.7%) and cement clinkers (8.0%) in the first quarter of 2018. Similarly, the volume of imports of construction materials such as iron and steel bars, and rods declined by 4.9 per cent during the quarter in review. The sector's growth albeit slower than that of the corresponding quarter of 2017 was driven by the ongoing public infrastructural projects such as roads and phase two of the standard Gauge Railway (SGR) as well as the continued development of buildings. During the review period, credit to the construction sector increased by 7.5 per cent compared to a growth of 2.6 per cent realized in the first quarter of 2017.

Electricity and Water

Activity in the electricity supply sub-sector was vibrant during the first quarter of 2018 mainly owing to increased use of less input intensive sources of energy such as geothermal power generation coupled with a slowdown in growth of thermal generation. During the period under review, the sector grew by 5.1 per cent compared to 6.1 per cent growth reported in the first quarter of 2017. Geothermal power generation increased by 12.8 per cent during the quarter in review compared to a contraction of 3.8 per cent in a similar period of 2017. The growth in the generation of electricity using thermal sources slowed down from a more than two-fold increase in the first quarter of 2017 to 13.9 per cent in the period under review. The increase in thermal generation was necessitated by significant decline in hydro generation in January and February. However, hydro generation grew markedly in March 2018 supported by heavy rains that prevailed during that month and consequently led to scaling down of thermal generation.

Transport and Storage

During the period under review, Transport and Storage sector registered a slower growth of 7.1 per cent compared to a 9.4 per cent growth recorded in the same quarter in 2017. The slowed growth was also manifested in the consumption of light diesel that declined by 1.9 per cent in the first quarter of 2018. The growth was driven by improved performance of the various sub-sectors especially transportation of passenger and freight through rail and water. The sector's performance was enhanced by a significant growth in the volume of cargo throughput (7.8%) and containers handled (8.1%) at the port of Mombasa. In addition, the sector benefited from the robust performance of the agricultural sector during the quarter under review.

Accommodation and Food Service Activities

Growth in Accommodation and Food Service Activities was robust in the quarter under review but comparably slower than level realized in the corresponding quarter of 2017. During the quarter, the sector is estimated to have expanded by 13.5 per cent compared to 24.5 per cent growth recorded in the first quarter of 2017, which was mainly on account of a rebound experienced in that quarter. The sector's performance is stabilizing following reform initiatives, restored security and investment opportunities in the sector. During the review period, the accommodation activities greatly improved, evidenced by the increase in the hotel occupancy level and the

number of visitors' arrivals through the two main international airports. The number of visitors' arrivals increased by 5.8 per cent in the review period.

Financial and Insurance

The Financial and Insurance sector grew by 2.6 per cent in the review quarter compared to 5.3 per cent in the first quarter 2017. Total domestic credit rose by 7.1 per cent, to stand at KSh 3,356.7 billion in March 2018. Net Foreign Assets increased to KSh 104.1 billion in March 2018 from KSh 94.8 billion in March 2017. Broad money supply (M3) expanded to KSh 3,015.7 billion in the first quarter 2018 from KSh 2,846.6 billion in the first quarter 2017.

Figure 2 presents the trends in interest rates for the period January 2017 to March 2018. The Monetary Policy Committee (MPC) lowered the Central Bank Rate (CBR) to 9.50 per cent in March 2018 from 10.00 per cent in the first quarter 2017. The interest rate for commercial banks loans and advances dropped marginally from 13.61 per cent in March 2017 to 13.49 per cent in March 2018. The savings rate increased from 5.89 per cent in March 2017 to 6.85 per cent in March 2018. The 91-Day Treasury bill rate dropped to 8.02 per cent in March 2018 from 8.68 per cent in March 2017 while the interbank rate increased to 4.90 per cent in March 2018 from 4.46 per cent in March 2017.

Figure 2: Trends in Interest Rates, January 2017 – March 2018

Figure 3 shows the trends of NSE 20 share index and the value of shares traded at the Nairobi Securities Exchange (NSE) from January 2017 to March 2018. The NSE 20-Share index rose to 3,854 points in March 2018, compared to 3,112 points in March 2017. The total value of shares traded increased to KSh 22.9 billion in the first quarter of 2018 from KSh 12.5 billion during the first quarter of 2017.
